ADVANCED IMPLANTOLOGY · VERONA

HUMAN CADAVER COURSE

Dear Colleagues,

We are delighted to invite you to our exclusive two-day Human Cadaver Course in Verona, Italy. This advanced course is designed for ambitious clinicians who wish to expand and refine their skills in implantology through hands-on training on human cadaver specimens.

Through a successful combination of informative short lectures and intensive hands-on training over two days, you will be able to perform the following procedures:

- **Extraction & immediate implant placement**
- **Lateral sinus floor elevation**
- **Soft tissue management using connective tissue grafts and free gingival grafts**

You will have the opportunity to gain practical experience in a highly realistic anatomical setting and under the expert guidance of specialists.

Beyond the scientific program, the course also provides an excellent platform for professional exchange, interdisciplinary discussion, and international networking with colleagues from around the world.

We look forward to welcoming you to Verona for two inspiring, intensive, and practice-oriented days in an exceptional learning environment.

With kind regards,
Tobias Fretwurst and Florian Kern
