2. OsteoRegeneration Day

SOFT TISSUE MANAGEMENT AROUND IMPLANTS LONG-TERM RESULTS

Dear colleagues!

The 1st Osteoregeneration Day in Düsseldorf is now history, and with just under 180 participants, it was a successful and fantastic event – one that we, Stefan Reinhardt, Alexander Scholz and the entire organising team at medentis, had not anticipated to this extent.

We would particularly like to thank the top speakers, who, with their topical presentations, struck a chord with the spirit of the times, and of course the numerous participants, who make such a large-scale event possible in the first place. That's why we've thrown ourselves straight into planning the 2nd OsteoRegeneration Day!

And this time, the focus will be on the highly topical subject of peri-implant soft tissue. Once again, we have been able to secure the services of distinguished, renowned speakers who will shed light on all the relevant aspects of this topic from different perspectives.

What surgical techniques are available for optimising soft tissue? When should I use them? Are there already materials available that can replace autologous grafts?

These are all questions that we are exploring and which will be addressed at the 2nd Osteoregeneration Day.

And, of course, such an event calls for the right setting, which is why medentis medical has chosen the beautiful Hotel Atlantic in Hamburg as the venue this time. Ultimately, the convivial social programme that medentis is known for will ensure that this training event turns into an unforgettable weekend.

Yours, Stefan Reinhardt
and Alexander Scholz
